Airbag Vests & Jackets

The **Advantage** hit-air Safety Vest

- The SAFEST
 - The FASTEST
- The COOLEST & Most COMFORTABLE

-For every rider

-For every ride

-Why not?

**We all know
it's not if we fall,
but when we fall.**

**We all fall from our
horses.**

Riding on the trail...

Competing...

Riding western...

Working...

Having fun...

Like the air bag in your car, it inflates so that you *hit air instead of something solid*. In 9 milliseconds, fast as a hummingbird's wings, faster than you blink, faster than you hit the floor if you fall from a chair.

The vest absorbs the force of falling by reducing "G" forces.

If the horse falls on you or steps on you; it reduces the force.

- Protecting the neck
- Protecting the spine & internal organs
- Protecting the tail bone & pelvis

**There is a hit-air safety vest
for you.**
